Culture

People-centred: meaningful relationships of and between consumers, staff and families. A trusted & respected organisation.

Coaching

Leaders are coached and leaders coach our people to deliver best practice.

Compliance

Minimum outcome: aged care regulatory standards are our foundation, not an aspiration, so they are met everyday. Underpinned by consumers choices & rights.

Consumer Consent: Care & Services

All staff will confirm with the consumer before commencing care and services.

What we will do:

- Consumers will be asked, not told - and we will check for understanding.
- This may involve lowering the mask so the consumer can understand and see the staff member when speaking (while maintaining safe distance).
- Consumers who have complex needs will have specific support.
- Staff allocation will be dedicated to the same consumer as much as possible.
- Duty lists are a guide not a fixed limit.

Resident-of-the-Day Revamp

We will engage more deeply with our residents, better understand their needs & preferences and tailor our care & services to meet their needs.

What we will do:

- We will elevate the importance of ROD.
- We will create quality care plans and make each ROD feel valued and respected.
- We will leverage Mint to invite input from every member of the team.
